

SAFEGUARDS 3

Mission

Deliver best-in-class safeguards and security training to government and commercial entities worldwide.

Competencies

Training and Mentorship

- Diverse, agile, expert delivery by subject matter experts.
- Vulnerability assessment training for practitioners.
- Formal instructor training (train-the-trainer).
- Design and develop mission-specific curricula.
- Border security and related interdiction training.
- Nuclear/radiological security and response operations consulting.

Assessment and Protection

- Critical infrastructure assessment and protection consulting.
- Agile and responsive solutions to current and evolving threats.
- Blended cyber/physical vulnerability assessments on existing and planned safeguards systems and their associated response using proven tools and methodologies.
- Design basis threat development for insider and outsider threats.

Performance

- **DoS ExBS:** Border Interdiction and Security training.
- WMD Non-proliferation training in multiple countries.
- **NERC:** Electricity grid security, design basis threat development, vulnerability assessment tools, and methodologies instruction, physical security-related information.
- International Law Enforcement Academy (**ILEA**) instructors: Hungary, Thailand.

Differentiators

- Recognized as the go-to DoS ExBS implementer.
- Members in good standing: **E-ISAC**, Physical Security Advisory Group (**PSAG**).
- Greater savings, agility, and response than large implementors.
- 20+ Years of international experience from the frontline officer to the cabinet-level.
- 30+ Years of experience developing curricula and training instructors worldwide.
- Nuclear and radiological safeguards and security consulting for international and domestic partners.
